

## SURFACE PROTECTION

A re-usable, multi-layered surface protection matting that withstands heavy foot traffic, Tools and Equipment.

It protects Hardwood Floors, LVT, Tile, Countertops, Stairs and other surfaces against typical construction zone hazards such as Paint, Liquids, Tool Impact, Sharp debris and Dirt.

**BAT Pro Surface Protection** features a lightly adherent underside to prevent movement, creating a slip-resistant surface that requires minimal taping during application.

Made from high quality recyclable fibres, this tear-resistant, waterproof mat is also breathable and flexible.

***It's easy to install and remove – simply roll it out, overlap, and you're ready to go !!!***

### NOTE:

- **BAT Pro Surface Protection** is not recommended for use on concrete floors, as the residue may affect adherence.
- It is best installed at room temperature (up to 30 degrees) and should not be exposed to direct sunlight for prolonged periods.
- Some surface preparation is required. Please ensure that the surface that the protection matting is being applied to is clean and free of debris to ensure good adhesion and the prospect of re-use.
- This product should not be installed on heated flooring, and heavy objects should not be placed on the matting for prolonged amounts of time ( 24 hours maximum ).
- Ensure that the surfaces being protected are dry before applying this matting.
- Taping down at the beginning of the roll is advised, and recommended overlap is 100mm.

### Product Dimension:

920mm x 30.5m

Re-Order Code: BP-SPS30
